How are you protecting data from insider threats?

74% of breaches originate within the extended enterprise[1]

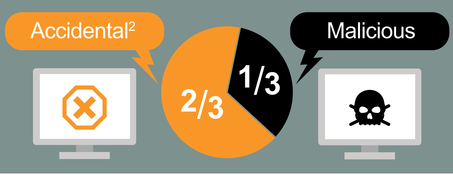
40% Employees

22% Third parties

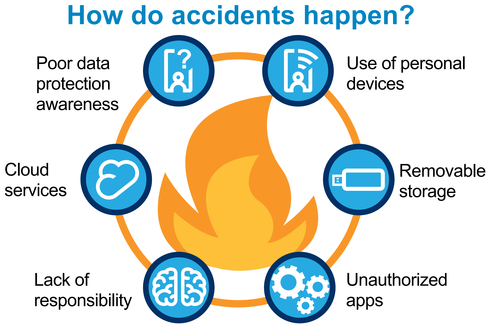
12% Ex-employees

Not all threats are due to malicious activity.

Carelessness can lead to accidental data theft and loss.



How do accidents happen?



35% of employees spend an average of two hours each week working in public places[3]

87% of senior managers upload business information on personal email or cloud accounts[4]

Who's responsible for protecting data?

Only **36%** of U.S. employees feel that protecting company data is their responsibility[5]

You want to enable your employees to collaborate and be productive — without intentionally or unintentionally putting data at risk.

Empower employees while protecting data with Dell Data Guardian

Protect
Guard data wherever it goes and however it is used.

Control
Define who can access data, when data can be accessed and how.

Monitor
Gain clear visibility into data activity and location.
